

Technology Without Geographical Borders

Corporate Profile & Enterprise Capability Framework

Connecting Libya From Its Coast To Its Desert

The Mission

Bridging the massive digital infrastructure gap in central and southern Libya to provide integrated, high-speed ICT solutions for government and private enterprise—regardless of isolation.

The Vision

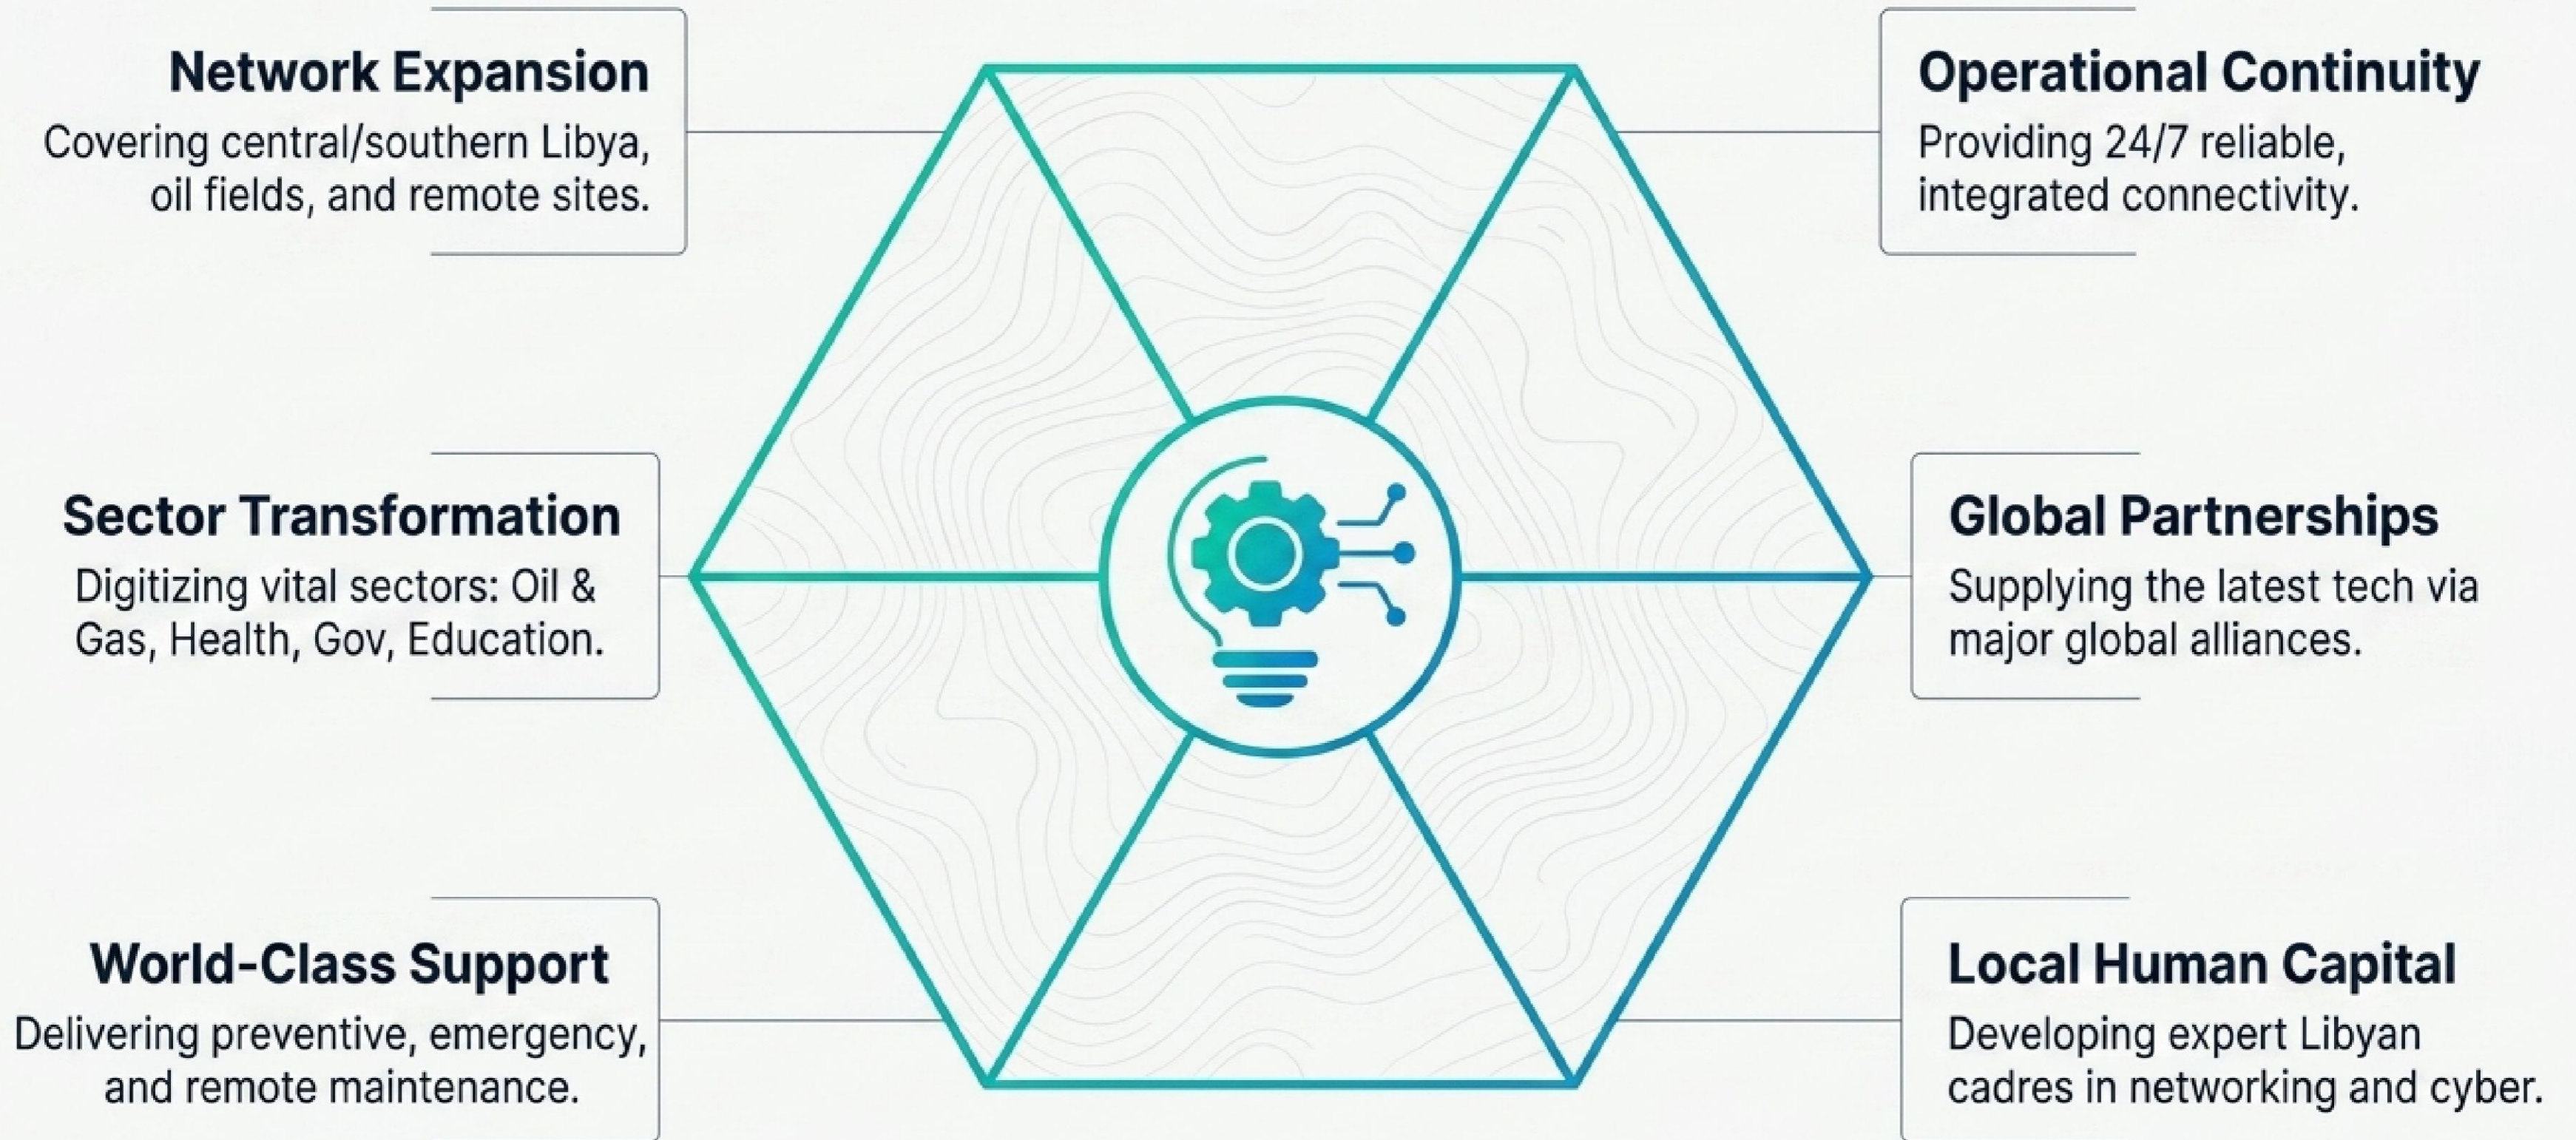

“Where connectivity ends, our work begins.”

Building a digital infrastructure that supports the national economy and empowers operational continuity in the harshest environments.

Engineering for Extremes: The Dual-Environment Reality

	Urban Enterprise Operations	Remote Desert Operations
Infrastructure Reality	Existing but fragmented municipal grids.	Zero traditional infrastructure; complete isolation.
Wast-Tec Connectivity Solution	High-speed dedicated enterprise internet with strict SLAs.	Satellite (VSAT) and specialized microwave networks.
Hardware & Architecture	Standard commercial LAN/WAN, VoIP.	Ruggedized industrial hardware, climate-controlled remote enclosures.
Primary Client Profile	Commercial HQ, Government.	Oil & Gas fields, remote construction camps, industrial facilities.

The Six Pillars of Digital Transformation

A Fully Integrated Technological Ecosystem

The Wast-Tec ICT Stack

Layer 3: The Assurance Shield

Protecting and maintaining the system with cyber and physical security.

Layer 2: The Enterprise Core

Powering the business logic, hardware, and internal networks.

Layer 1: The Connectivity Foundation

Bridging the physical divide across extreme terrains.

Solutions designed for harsh environments.

Every layer is installed, optimized, and managed by highly qualified Libyan engineers with deep field experience.

Layer 1: The Connectivity Foundation

The desert is no longer isolated.

Urban Corporate Internet

Dedicated high-speed lines for city HQs and commercial complexes, backed by clear service contracts and stable data transfer rates.

Remote & Desert Telecommunications

Deploying satellite (VSAT) and microwave networks for oil fields, remote camps, and off-grid facilities.

Network Design & Installation

Custom architecture and implementation of scalable LAN, WAN, and wireless networks for industrial and residential complexes.

Layer 2: The Enterprise Core

From the factory directly to your site.

Hardware & Equipment Supply

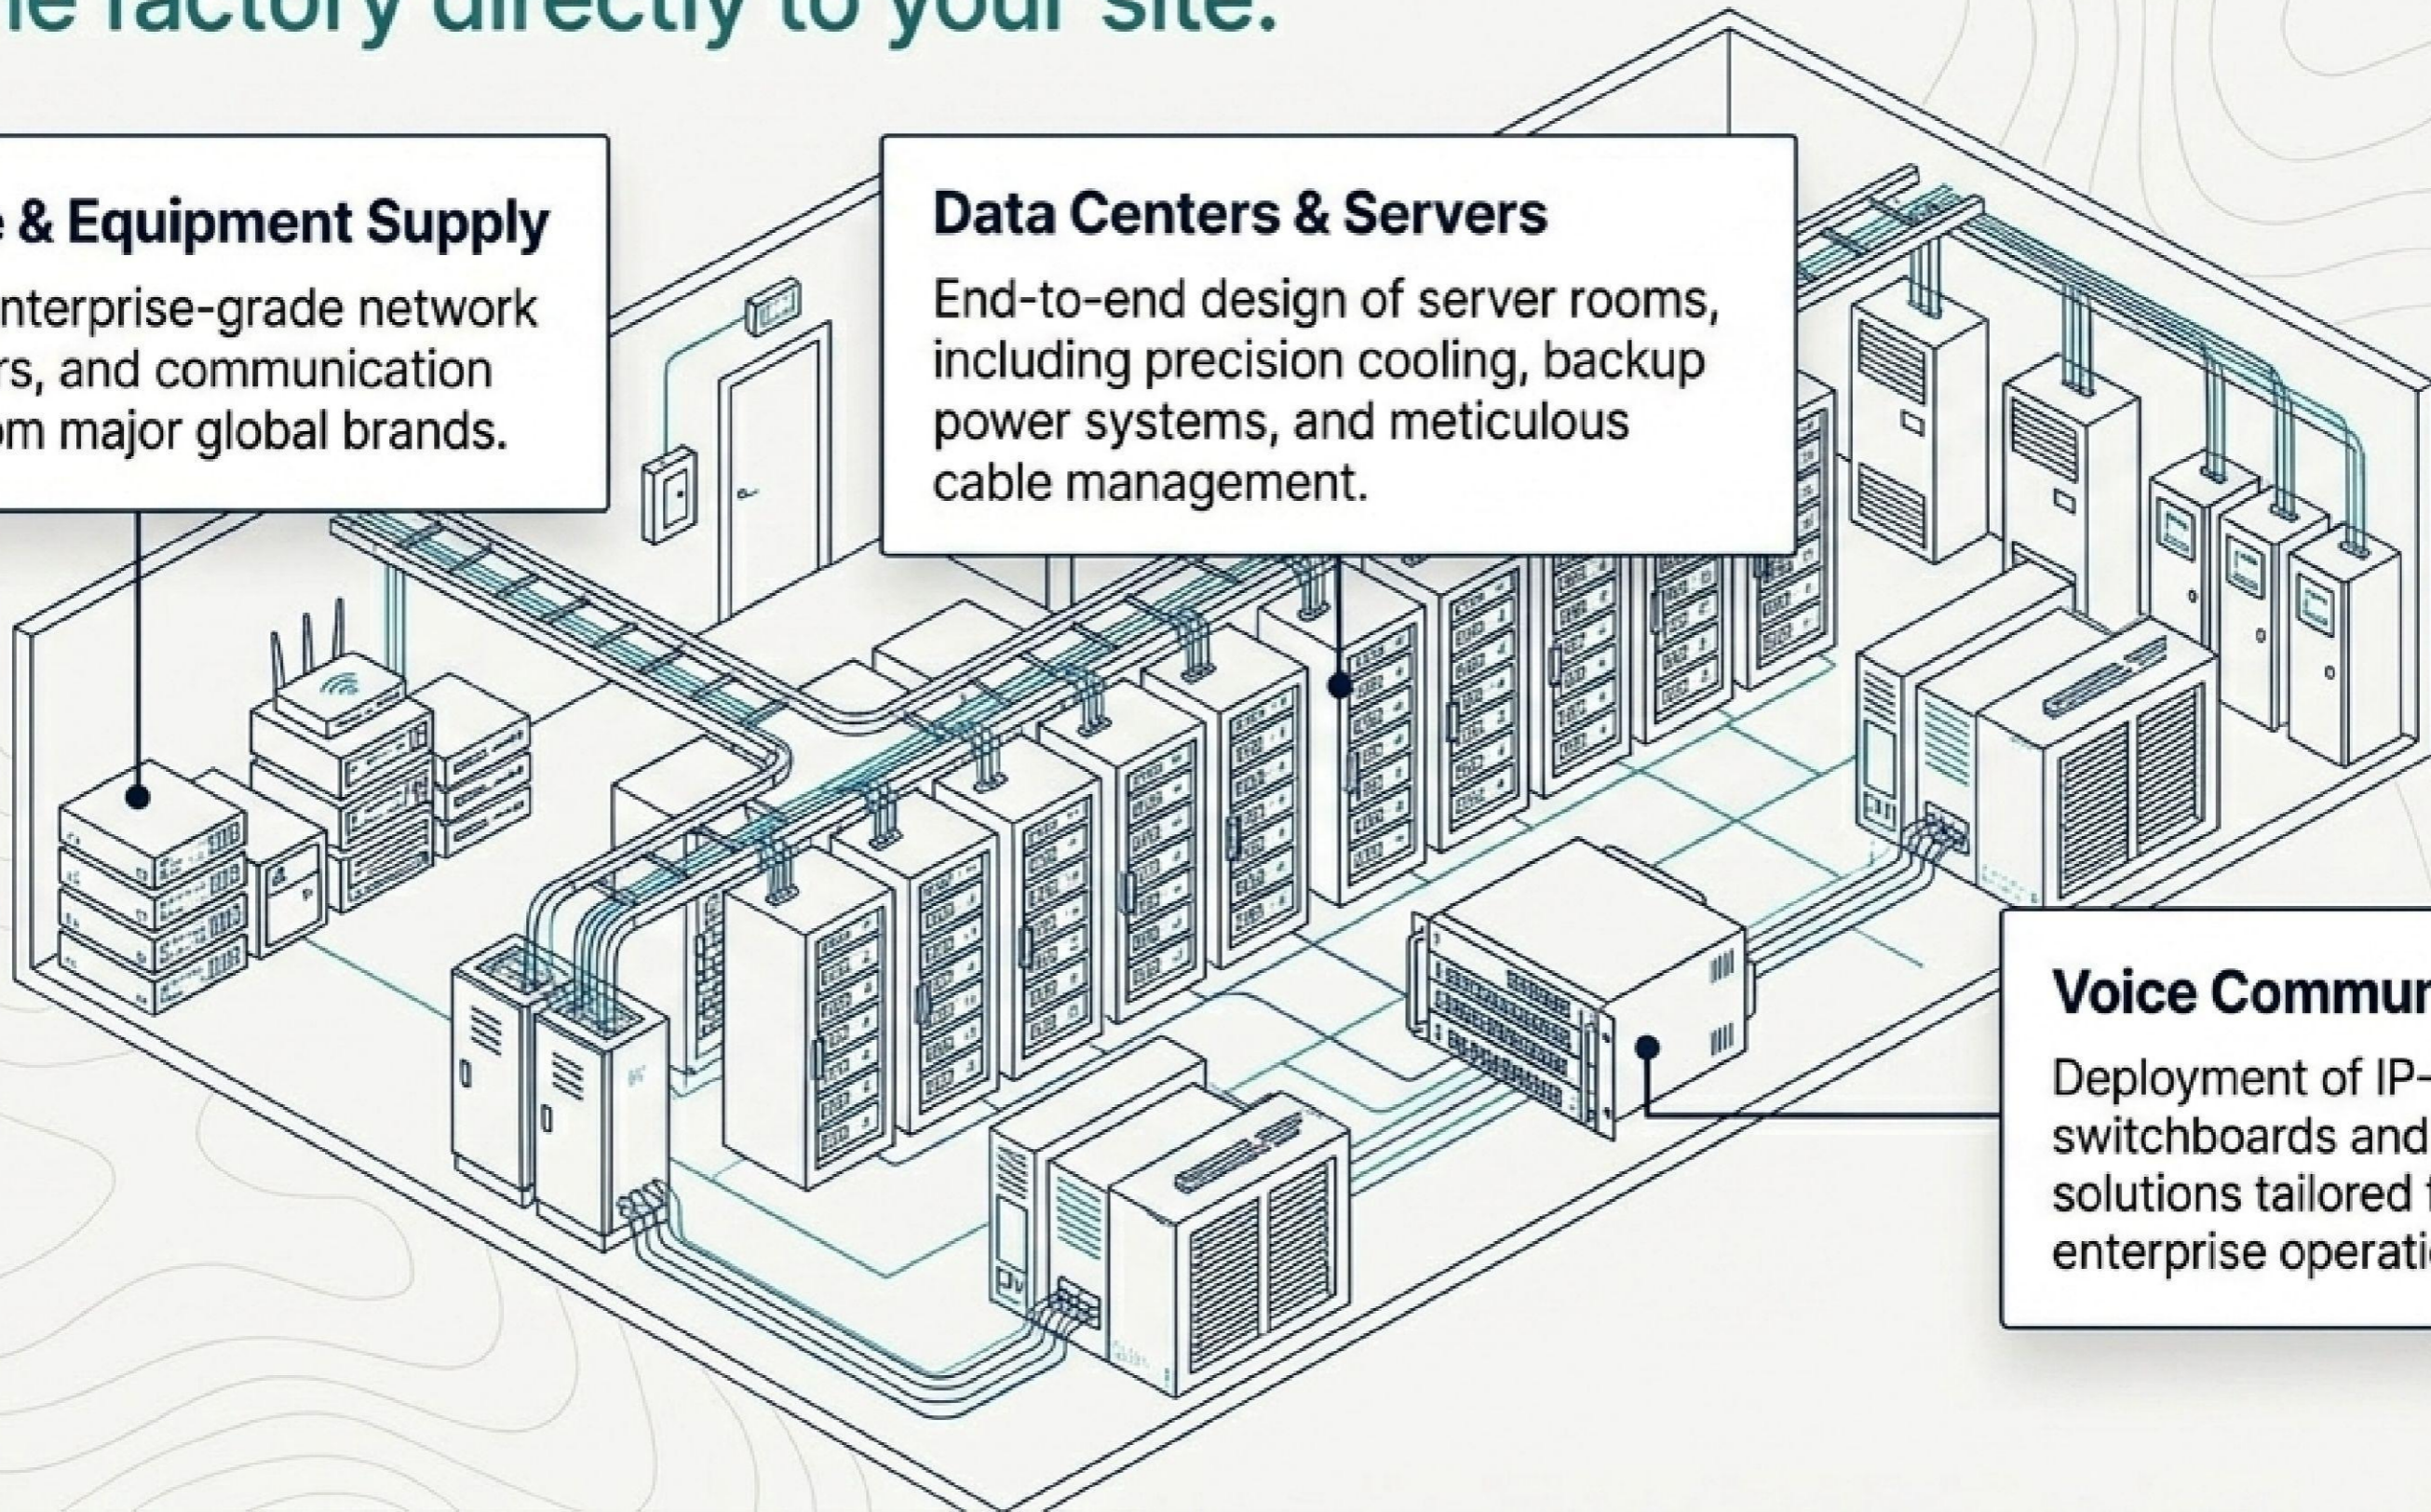

Importing enterprise-grade network gear, servers, and communication systems from major global brands.

Data Centers & Servers

End-to-end design of server rooms, including precision cooling, backup power systems, and meticulous cable management.

Voice Communications

Deployment of IP-PBX digital switchboards and secure VoIP solutions tailored for large enterprise operations.

Layer 3: The Assurance Shield

Uninterrupted connectivity secured against all threats.

Cybersecurity

Comprehensive network protection including advanced firewalls, Identity and Access Management (IAM), and proactive threat detection to safeguard institutional data.

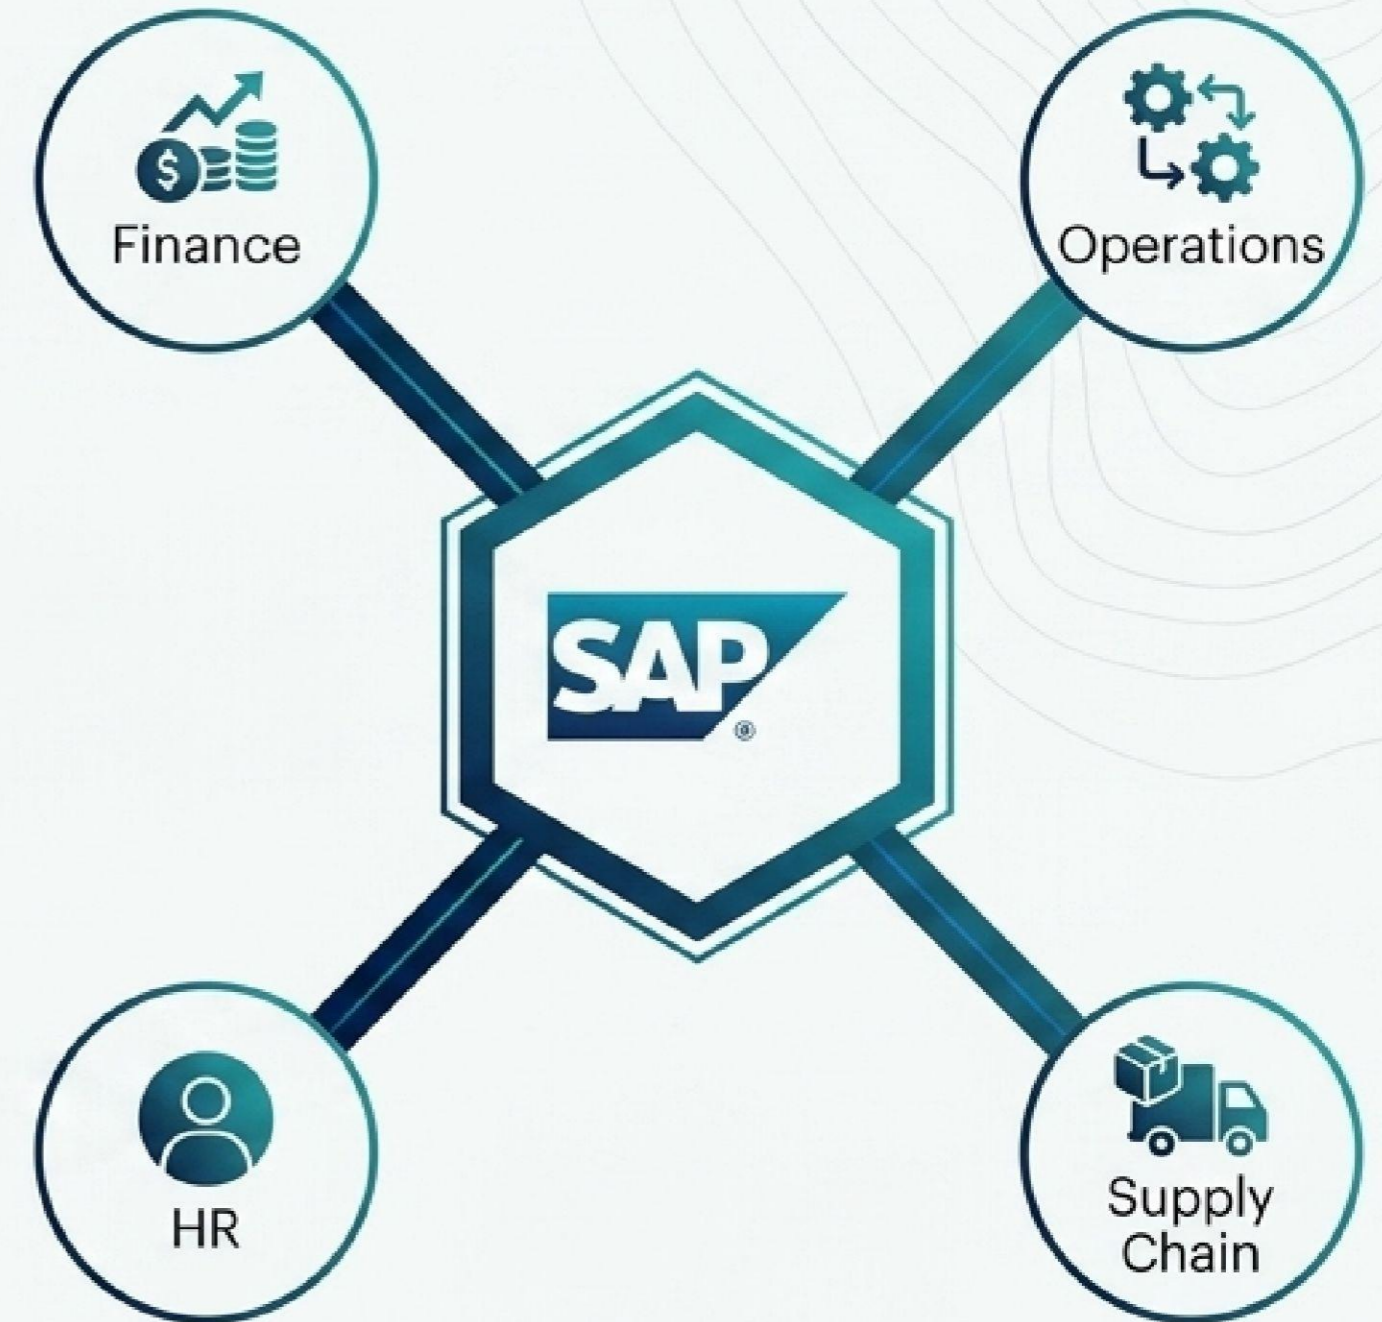

Surveillance & Physical Security

Installation and management of closed-circuit television (CCTV), advanced surveillance cameras, and strict access control systems for critical industrial and operational sites.

Strategic Enterprise Integration: Official SAP Partner

As an official partner for the SAP ERP System, Wast-Tec goes beyond physical infrastructure. We provide the ultimate software engine required to run global enterprises seamlessly across Libya.

End-to-End Operational Continuity

The Unbroken Chain

**A single, accountable partner for
your entire digital ecosystem.**

Technical Support & After-Sales

We are here before you need us.

Proactive Support Timeline

Phase 1: Remote Monitoring (24/7)

Continuous, proactive surveillance of network health to identify anomalies before they impact operations.

Phase 2: Preventive Maintenance

Scheduled, periodic interventions and system updates to ensure optimal longevity of ruggedized equipment.

Phase 3: Emergency Field Dispatch

Rapid-response deployment of expert Libyan engineers directly to the site.

“Our team is in the field before your problem ends.”

The Wast-Tec Operational Ecosystem

Global Supply Chain

Importing the latest technologies directly from the factory with full warranties.

**Your reliable digital partner
in every environment.**

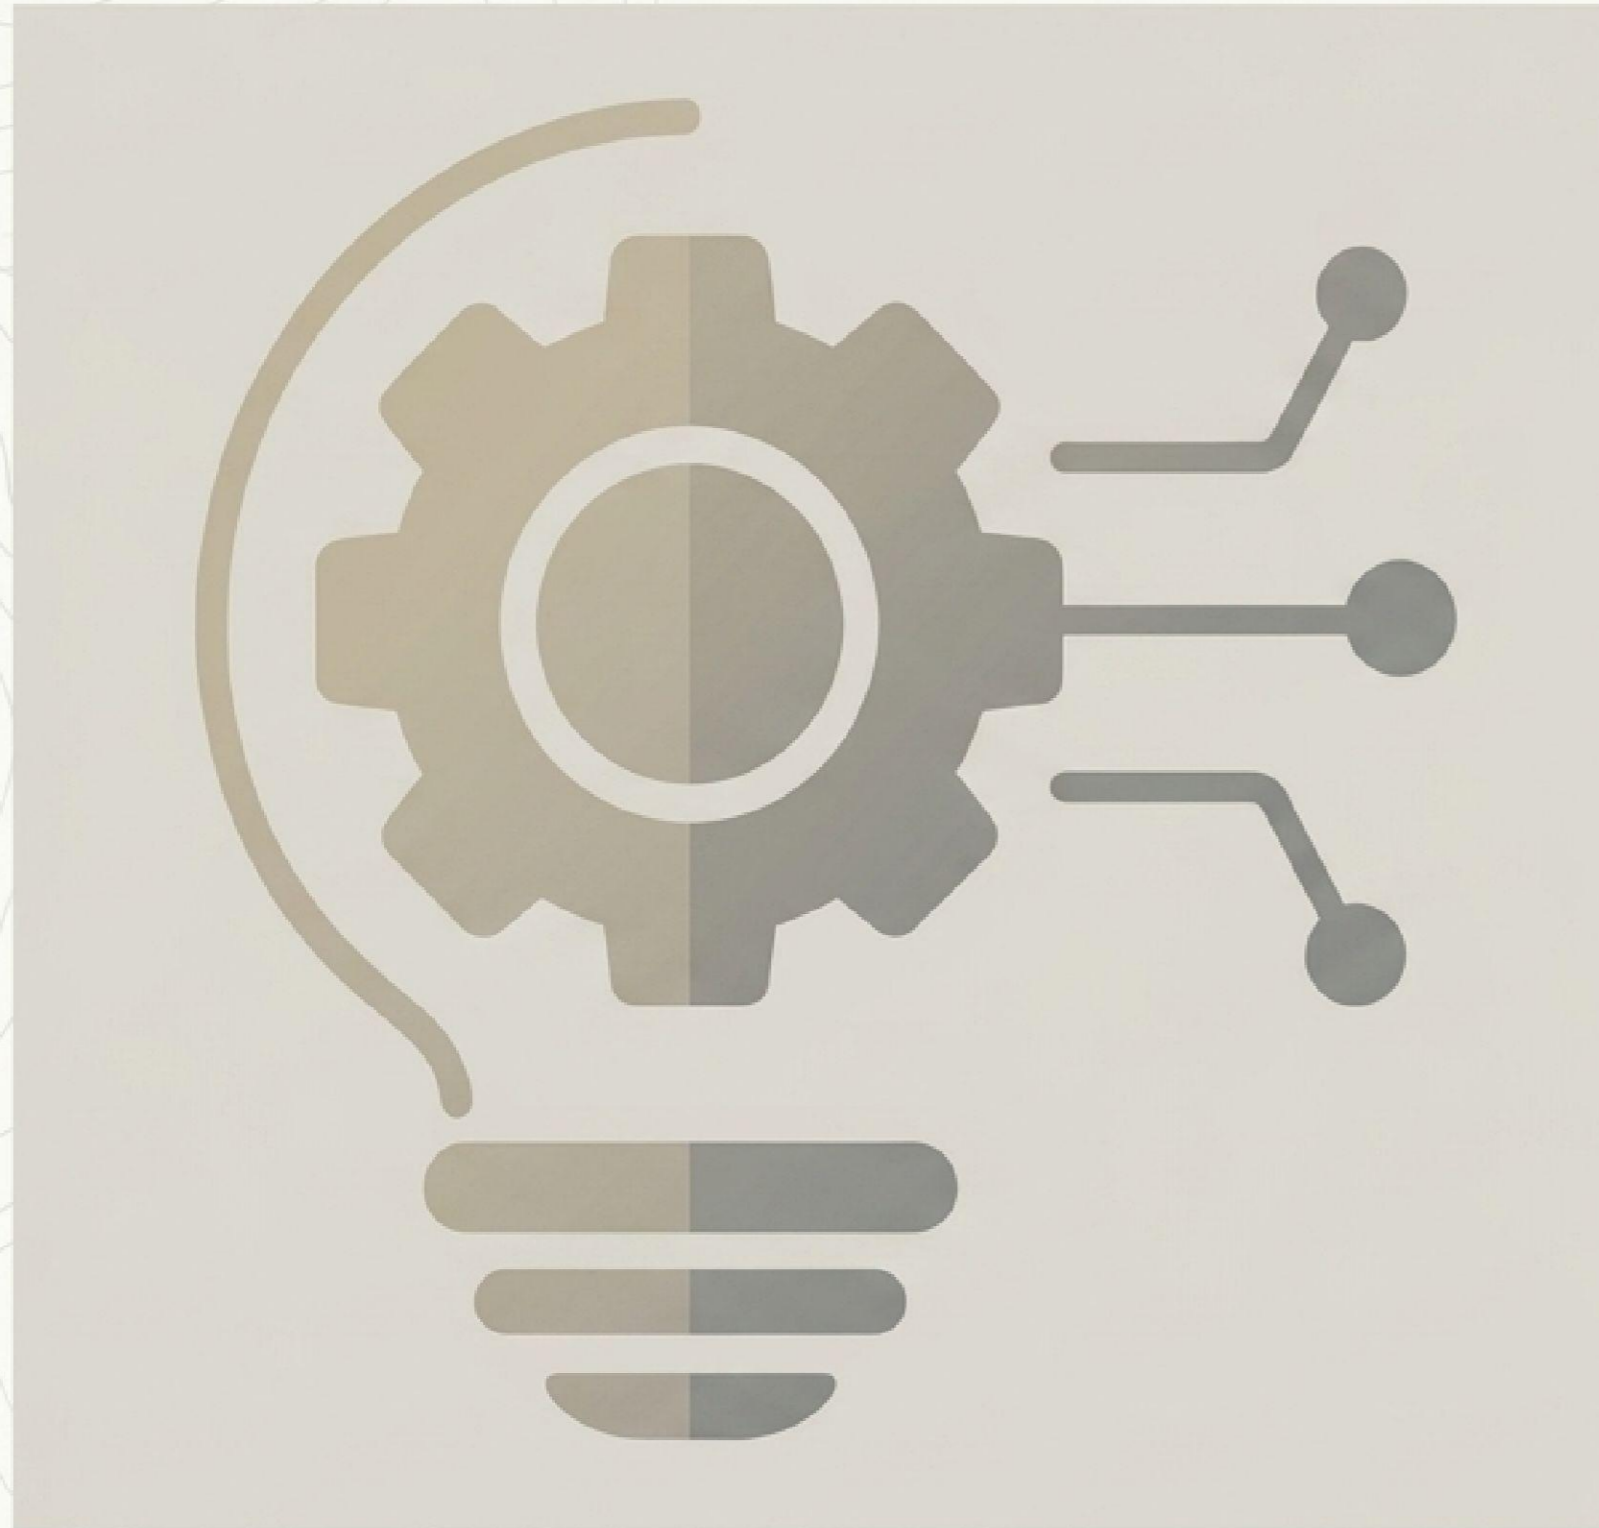

Local Field Expertise

Installation and optimization by highly qualified Libyan engineering cadres who intimately understand the terrain.

Always-On Support

24 hours, 7 days — because your work doesn't stop.
